

# Capabilities Statement

Since 1984, Knowledge Relay has been electrifying data for unrivaled Project Controls.

The company's data solutions improve decision-making and risk-management for the Department of Energy and U.S. commercial nuclear power sites, plus engineering and construction firms. No big prime contractor or internal IT team can deliver the analysis and reporting Knowledge Relay can—all for less than the cost of a single FTE.

Knowledge Relay technologies and services automate, integrate, and analyze all project data sources to uncover essential decision-support metrics other providers simply cannot generate. As a wholly U.S.-based small business with almost 40 years of industry leading expertise, Knowledge Relay is trusted by critical infrastructure teams for supporting their critical applications and high-performance platforms.

## Core Capabilities

Our technology specialists, subject-matter experts in Project Portfolio Management (PPM), and business professionals analyze, research, design, and implement solutions across:

- Data Integration, Conversion, Cleansing, Migration (ETL)
- Data Scheduling
- Project Management Metrics & KPI's
- Dashboards
- Reporting Services
- Automation of Earned Value
- What-If Analysis

Our information technology architecture, support, management, project management, and improvement consulting have saved our customers millions of dollars in improved efficiencies and capabilities via:

- Business Strategy
- Business Analysis
- Change Management
- Management Scorecards
- Project Controls
- Project Health Analytics
- Project Management
- Regulatory Metrics

***Knowledge Relay solutions are deployed for Project Controls at U.S. Department of Energy sites and approximately 75% of U.S. commercial nuclear power sites.***

## Technology Solutions

Knowledge Relay's technology services focus on robust, scalable, secure, and stable solutions. We deliver our software for your systems or can assist you in optimizing your current technology solutions. We deliver projects to completion, on time and on budget, where others may have failed via:

- Architecture Solutions
- Data Cleansing & Conversion (Automated)
- Database Design, Development & Maintenance
- Enterprise Reporting Solutions (Automated)
- Verification & Validation Service
- Knowledge Transfer Solutions

## Proven Software Solutions

Knowledge Relay has created some of the most powerful Project Portfolio Management (PPM) software solutions available, deployed today in most of the nation’s nuclear power plants and across U.S. Department of Energy sites. Our proprietary software includes:

- KR Reports (Analytics & Reports)
- KR Dashboards (Analytics & Dashboards)
- KR Data Scheduler (Automated Data Services)
- Job Server (Automated Visualization Delivery)
- What-If Analyzer (Budget and Schedule Change Analysis and Impacts)
- Enterprise - Earned Value (Automated)
