

Capabilities Statement

Knowledge Relay is a leading producer of software that generates advanced metrics and analytics. We use unique data migration and extraction-transformation-loading (ETL) services to drive those metrics. And both our data migration and data visualization tools run in a parallel, automated way that improves speed, management decisions, and performance for our clients—while reducing risks.

Knowledge Relay helps clients to increase the effectiveness of their information management, systems integration, data migration, project controls, and visualization processes. By successfully aggregating diverse data sources and separating data processes from display mechanisms, we automate the entire process—from data to decisions. Systems are synchronized and reports are created on an automated or ad hoc schedule as needed.

As an entirely U.S.-based small business with 40 years of industry expertise, Knowledge Relay is committed to creating innovative and flexible data solutions for U.S. critical infrastructure, government, and commercial clients to maximize operational efficiency and minimize risk.

Core Capabilities

Our technology experts and business professionals analyze, research, design, and implement solutions across:

- Data Dashboards and Visualization
- Data Integration, Conversion, Cleansing, and Migration (ETL)
- Data Scheduling
- Project Management Metrics and KPI's
- Project Controls
- Reporting Services
- What-If Analysis

Approximately 75% of U.S. Nuclear Power Plants use Knowledge Relay software and services to improve operating efficiencies

Knowledge Relay's IT architecture, support, management, project management, and improvement consulting have saved our clients millions of dollars in improved efficiencies and capabilities via:

- Business Analysis
- Business Strategy
- Change Management
- Management Scorecards
- Project Controls
- Project Health Analytics
- Project Management
- Regulatory Metrics

Technology

Our technology solutions complement and optimize existing data systems—including Microsoft Power BI, Oracle Primavera Enterprise Project Portfolio Management, SAP, and even custom systems—uniquely delivering:

- Architecture Solutions
- Enterprise Reporting Solutions (Automated)
- Data Cleansing & Conversion (Automated)
- Database Design, Dev & Maintenance
- Knowledge Transfer Solutions
- Verification & Validation Service

Proven Software Solutions

Knowledge Relay has created some of the most powerful Portfolio Management software solutions available, and our software is used at most of the nation's nuclear power plants and the U.S. Department of Energy, including:

- KR Reports
- KR Dashboards
- KR Gantts
- KR Data Scheduler

Representative Clients

Commercial	Government
American Electric Power (AEP)	U.S. Department of Energy — Hanford Site Mission Support Alliance (MSA)
Constellation Energy Corp.	
Duke Energy	U.S. Department of Energy — Hanford Site Waste Treatment and Immobilization Plant (WTP)
Exelon	
First Energy	U.S. Department of Energy — Idaho National Lab
PG&E	U.S. Department of Energy — Y-12 National Security Complex
Xcel Energy	

North American Industry Classification System (NAICS)

513210 – Software Publishers

518210 – Computing Infrastructure Providers, Data Processing, Web Hosting, and Related Services

541511 – Custom Computer Programming Services

541512 – Computer Systems Design Services

541513 – Computer Facilities Management Services

541611 – Administrative Management and General Management Consulting Services
